Analytic Framework: Team-Based Care for Improved BP Control

**Team-Based Care**

- **Health System Staff** (physicians, nurses, pharmacists, social workers, dieticians, other professionals)

**Patients Diagnosed With Hypertension**

- Organization of Team Member(s)

  - PCP* → Patient

**Improved Support for Patients**

  - Medication management
  - Adherence support
  - Support for self-management

**Improved Quality of Hypertension Care**

  - Concordance with evidence-based guidelines
  - Better patient participation
  - Better care experience for patients

**Improved Patient Satisfaction with Care**

**Increased Patient Adherence to Treatments**

**Improved Team Member Collaboration**

  - Care coordination
  - Communication
  - Decision / process support

**Improved Quality of Team Member Collaboration**

**Additional Benefits:**

- Improved management of co-morbidities

**Health Outcomes**

- Increase in proportion of patients with blood pressure controlled
- Reduction in systolic blood pressure (SBP)
- Reduction in diastolic blood pressure (DBP)

**Reduced CVD morbidity and mortality**

**Intermediate Outcomes**

**Target Population**

**Causal Relationship**

**Feedback Loop**

*PCP = Primary Care Provider*
