Therapeutic Foster Care: For Children with Severe Emotional Disturbance

Task Force Finding

**Intervention Definition**
In the cluster therapeutic foster care interventions, groups of five families cooperated in caring for five young children (ages 5 to 13 years) with severe emotional disturbance.

**Task Force Finding (June 2002)**
On the basis of too few studies and inconsistent findings, the Task Force finds insufficient evidence to determine the effectiveness of cluster therapeutic foster care in improving violent outcomes among participants.
